

Group **ATP**

HVAC for heavy industry

ONSHORE - OFFSHORE - HAZARDOUS LOCATIONS

ATP manage the whole process to build complex HVAC systems, from engineering to turnover.

PRODUCTS : POWER & CONTROL PANELS
MAKE-UP AIR UNITS
CHEMICAL FILTERS

EXd EQUIPMENTS
DUCT WORKS
HEATERS

CONTROL SYSTEMS
PIPING & VALVES
FANS

COMPANY MAIN DATA

ATP is a EPC company focused on customized HVAC systems with over 10 years of experience and successful projects in Europe; since 2012 ATP extended its activity in CANADA providing HVAC construction and engineering services for international companies.

ATP has a solid presence in Oil & Gas arena as Subcontractor of international Main Contractors providing all works and services with permanent personnel as engineers, mechanical /electrical / instruments technicians, foremans, pipe fitters, sheet metal workers, electrical/instr workers.

ATP is able to provide HVAC systems for HAZARDOUS AREAS and HVAC fully engineerized, packaged systems on skid, a new concept of HVAC.

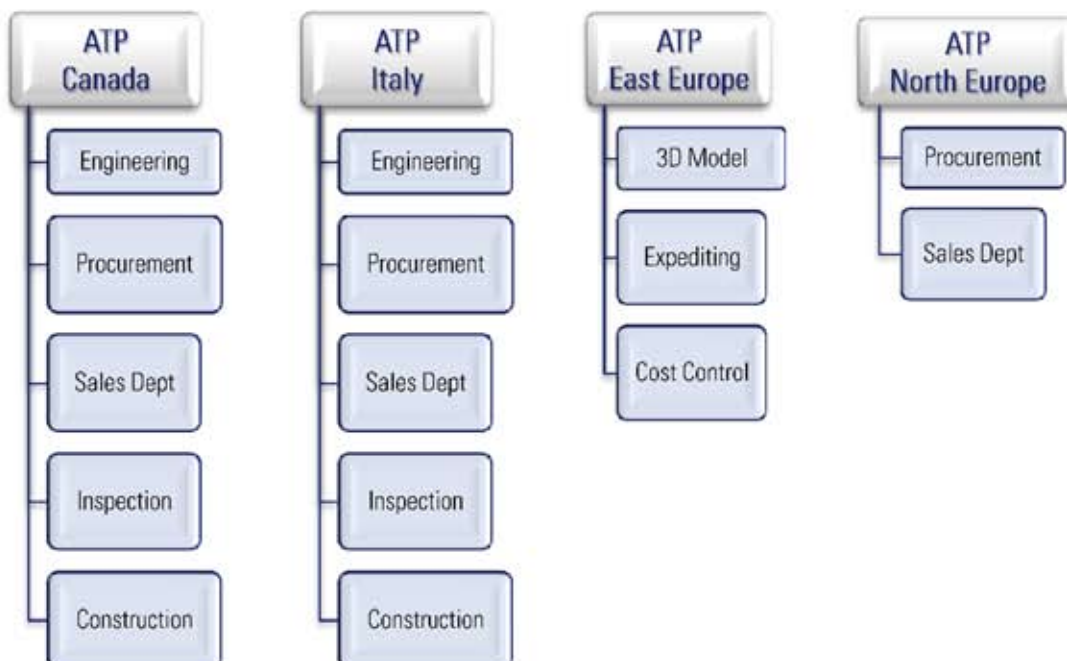

LOCATIONS & SERVICES

CANADA – *ATP Canada Inc*: Engineering procurement and construction

ITALY – *ATP SpA*: Engineering procurement and construction

ROMANIA – *ATP East Europe Srl*: 3D models (PDMS) services, desk expediting, cost control

U.K. – *ATP North Europe Ltd*: Commercial services, sales & procurement

COMPANY MAIN DATA

CORE BUSINESS

ACTIVITY: EPC of HVAC Systems, Operations & Maintenance of HVAC Systems

EXPERTISE: HVAC for Oil&Gas, Hazardous areas, Off-shore plant, LNG, heavy industry, chemical

EXPERIENCE: more than 10 years

SPECIAL CUSTOM PRODUCTION

Fully engineered HVAC Systems, packaged on skid.

LIABILITY

CGL INTACT: 5.000.000 \$CAD

HSE

2013: 0 incidents

2014: 0 incidents

QA/QC

ISO 9001:2008

REGISTRATION

ISNetworld # 400-197-493 Grade A/B

DIRECT KEY PERSONNEL

Shareholders: 2

Directors: 3

Managers: 5

Engineers: 8

Total employees: 40 people

PORTFOLIO IN EXTREME ENVIRONMENT

HVAC Systems for Process buildings for HUSKY Sunrise project – Alberta – (Client: Saipem)

HVAC operations services for CNRL – Alberta – (Client: CNRL)

HVAC Systems for DCU Exp. 2 of CNRL – Alberta – (Client: Technip)

HVAC systems of Matzekyai Nafta – Lithuania – (Client: KTI)

PROFESSIONAL SERVICES

3D MODELS with PDMS (Plant Design Management System)

3D MODELLING OF EQUIPMENTS

Piping, Ducting and Cable Tray modeling with primary supports and secondary supports Clash & Consistency checking

Extraction of Drawings like Nozzle orientation , piping layouts, support DD and Isometrics

Preparation of schematic diagrams and P&IDs

PREPARATION OF EQUIPMENT LAYOUT FOR UTILITY PLANTS

PDMS integrates with all interface products to form a complete and configurable 3D plant design solution for the power and process industries.

BENEFITS:

Increased design efficiency

Reduced site rework

High project quality

Powerful change management

Improved communication

Minimised schedule time

DESK EXPEDITING

FEEDBACK ON THE PROGRESS OF THE SUPPLY,

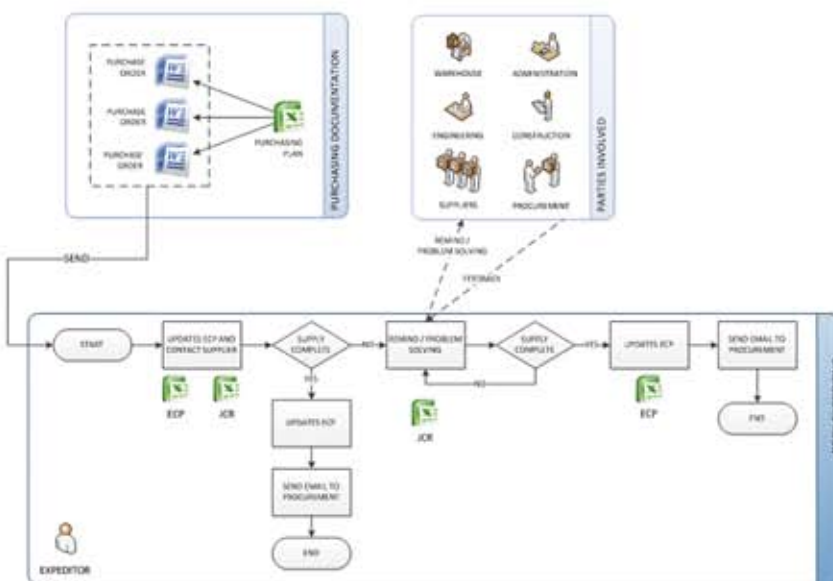

with reference to the main milestones and deadlines of the project to check whether the project is still within the agreed schedule.

DELAYS (actual or expected) IN MANUFACTURING AND/OR SHIPPING,

their reasons and the possible means to avoid or mitigate them. This problem solving activity includes various kind of actions, such as (but not limited to) the following:

- Clearly identify the problem;
- Involve the Project Team to verify the feasibility of alternative solutions and/or change orders;
- Interface with Customer to verify the impact of possible delays and/or change orders;
- Organize meeting and audits to verify the seriousness of the problem;
- Take actions toward Vendor's sub-contractors;
- Do a market survey in order to find alternative Vendors;
- Facilitate communications and solve misunderstandings.

CONFIRM DATES FOR FIELD EXPEDITING ACTIVITIES

DESK EXPEDITING FLOW

EXPEDITING PROCESS

refers to the procurement organization and is aimed to ensure the timely receipt of equipment, materials, services and documentation in order to meet critical project milestones.

Furthermore the records derived from the expediting activities are useful in the final evaluation of the Vendor's performance. Desk Expediting consists in soliciting Vendors with phone calls and/or written e-mails. Clearly a written correspondence is preferred in order to keep the traceability of events.

WHERE WE ARE & WHERE WE WORKED
